EDUCATION

Full Stack Web Developer
Masai School Bangalore
July 2023 - March 2024

Bachelor of Technology in Computer Science & Engineering(CSE)
Dr APJ Abdul Kalam Technical University Lucknow
August 2018 - July 2022

TECHNICAL SKILLS

Java | DSA | HTML5 | JavaScript | React | Redux | RESTful APIs | MongoDB | CSS3 | Node.js | Express.js | MySQL | Software Testing | Agile development | Git | Visual Studio

SOFT SKILLS

Adaptability | Time Management | Teamwork | Attention to Detail | Problem Solving | Effective Communication

CERTIFICATIONS

Machine Learning 🔗
Eisystem
Interned at EiSystem under IIT BHU for a duration of six weeks, enhancing data skills through machine learning for disease prediction, and advancing healthcare with logistic regression and neural networks.

MS Excel 🔗
Great Learning
Earned Microsoft Excel certification from Great Learning, mastering data analysis, financial modelling, pivot tables, visualization, macros, enhancing productivity and data manipulation skills.

Anshu Kumari

Full Stack Web Developer

PROFESSIONAL SUMMARY

Dynamic and highly proficient Full Stack Web Developer with expertise in the MERN stack. Skilled in designing and developing efficient server-side APIs using Node.js and Express.js. Demonstrates a strong understanding of frontend technologies such as React.js and a keen eye for creating seamless integration between frontend and backend components. Adept at conducting thorough testing and debugging to ensure reliable and stable web applications. Constantly staying up-to-date with the latest web development trends and best practices to enhance the development process. Excellent problem-solving skills, attention to detail, and proven ability to collaborate effectively in a team environment.

PROJECTS

1. Figma Clone | 🌐 | ⦿
HTML5 | CSS3 | SASS | Responsive Web Design
- Enhanced a Figma clone for designing websites and apps.
- Ensured responsive design across devices.
- Added an information section to the contact page for user guidance.
- Integrated a footer for consistent navigation and professionalism.
- Optimized usability and user experience for efficient design creation.

2. Globe Gliders | 🌐 | ⦿
JavaScript | Git | HTML5 | RESTful APIs | CSS3 | Responsive Web Design | Visual Studio
- Revolutionizes travel planning with a cutting-edge booking platform
- Streamlines registration and authentication processes for hassle-free access
- Empowers administrators with comprehensive CRUD functionalities for managing travel packages and bookings efficiently
- Intuitive interface for browsing destinations, exploring travel packages, and making bookings
- Integrate a trusted payment gateway that supports various payment methods, including credit/debit cards, digital wallets, and bank transfers. Ensure compliance with industry standards for data security and encryption to safeguard users' financial information
- Handles every aspect of travel management, from destination management to package customization and booking oversight
- User-centric design for a smooth and engaging experience

3. Foggy Fashion | 🌐 | ⦿
JavaScript | React | Redux | Git | HTML5 | CSS3 | Chakra UI
- Developed a user authentication system to ensure secure access to the website.
- Implemented an add-to-cart feature that allows users to easily select and purchase items.
- Integrated a secure payment option to facilitate smooth and reliable transactions.
- Develop a seamless and secure authentication process, offering options such as email/password login, social media login integration, and two-factor authentication for added security.
- Enhance the women's section with curated collections, trend forecasts, and style guides tailored to different occasions, body types, and fashion preferences
